DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims, drawn to a multiple-channel semiconductor device, classified in class 257, subclass 411.
- II. Claims 14-21, drawn to a method for forming a multiple-channel semiconductor device, classified in class 438, subclass 282.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed could be manufactured by a materially different process that could include the deposition of a first insulating layer, forming a material layer on the first insulating layer, doping the first material layer, forming a second insulating layer, forming a second material layer and doping the second material layer, forming a third insulating layer, and forming a third material layer, or the channel regions could be formed by implanting.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
